

Computer Science Hero

1. Problem Description

We've all grown up idolizing heroes of Computer Science like Alan Turing, Ada Lovelace or John Presper Eckert. This is your opportunity to memorialize the remarkable contributions of your chosen hero.

Develop a java program that prints the following information for your selected Computer Scientist:

- Title of Assignment and your name
- His or her name
- Years they were born and died (if applicable)
- Brief summary of what they did

2. Notes

- In the event you gave away all your Computer Science trading cards, you can get some ideas here: http://en.wikipedia.org/wiki/List_of_computer_scientists
- Turn in only your source (.java) files.

3. Required Main Class

CSHero

4. Required Input

None

5. Required Output

Your output should look like the following example. It should include your name as well.

```
Computer Science Hero - E. Eckert
```

```
Name: John Presper Eckert
```

```
Dates: 1919 - 1995
```

```
Accomplishments:
```

```
John invented the first general-purpose electronic digital computer (ENIAC),  
founded the first commercial computer company, and designed the first  
commercial computer in the U.S. (UNIVAC).
```
